

## HACRES MEETING NOTES

Date: 9/6/97

Location: Red Cross

- Andy, N9WCN, opened then meeting at :13 AM
- This meeting will be on APRS.
- There are a number of visitors here that are here from the surrounding areas that are involved in APRS.
- The APRS Talk
  - Needs a TNC with KISS mode operation to use APRS
  - The program is on the inter net at: [aprs.rugers.edu](http://aprs.rugers.edu). also there is another one at [www.tapr.org](http://www.tapr.org).
  - You need to know where you are so you can look it up in the one of the call book servers to get the longitude and latitude.
  - APRS Software is available on the internet at [www.tapr.org](http://www.tapr.org)
  - Sid, NH7C who gave some of the presentation can be reached at [nh7c@aol.com](mailto:nh7c@aol.com).
- Jeff Hendricks stated that the Hamilton Count EOC would be sending Alpha Pages out to those on the Sky Warn system for weather alerts. Please contact Jeff if you would like to be on that list at [jhendric@tiptontel.com](mailto:jhendric@tiptontel.com)
- At [www.infobeat.com](http://www.infobeat.com) one can find a weather net alert information on storm predictions to see the weather service expects to call up weather net.
- Arnal Cook, N9AKX, is asking for help in trying to locate someone who is interfering with Ritron's commercial repeater in town. He would like hams to monitor 469.500 MHz when they are driving around town. When they hear digital packet bursts to give him a call at Ritron or on the repeater 147.390. These interference's last from an hour to two or more. The interference may not be there for several days. It usually occurs during the daytime.
